

MATT THEODORE MANAMTAM

Junior Software Engineer | Full-Stack Web Developer

Bugallon, Pangasinan | matt.manamtam@gmail.com | mattmanamtam-portfolio.vercel.app | github.com/Matth-eo

PROFILE STATEMENT

BS Information Technology graduate focused on full-stack software development, with hands-on experience building database-backed web applications and supporting enterprise IT operations. Comfortable with Next.js, React, Node.js, PostgreSQL, Prisma, MongoDB, REST APIs, authentication, cloud services, and deployment. Builds practical products with an emphasis on secure user-scoped data, maintainable code, and responsive interfaces.

EXPERIENCE

Concentrix - Baguio Site A

IT Support / IT Operations Intern

Dec 2025 - Mar 2026

Baguio City

- Resolved support tickets involving LAN connectivity, login failures, Citrix issues, slow workstations, hardware faults, and workstation configuration across production and training areas.
- Reimaged and deployed IGEL thin clients and Windows mini PCs; performed diagnostics, cable and monitor replacement, workstation verification, inventory checks, and device preparation.
- Documented troubleshooting activities and coordinated with IT staff and fellow interns while maintaining accurate equipment and ticket records.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL, HTML, CSS

Frontend: React, Next.js App Router, Tailwind CSS, responsive UI development

Backend: Node.js, Express.js, Laravel, REST APIs, Server Actions, Auth.js / NextAuth

Databases: PostgreSQL, Neon, Prisma ORM, MongoDB, MySQL

Cloud & Tools: AWS (S3, Lambda, DynamoDB, Cognito, EventBridge), Vercel, Git, GitHub, Postman

PROJECTS

ApplyFlow - Job Application Tracker | Next.js, TypeScript, Prisma, Neon PostgreSQL, Tailwind CSS

2026

- Built a full-stack tracker with registration/login, application status CRUD, search, pagination, and user-scoped data persistence.
- Added role-based administration and dashboard reporting while keeping user workflows separated from admin-only functionality.

Evolv - Personal Development Platform | Next.js • TypeScript • PostgreSQL • Prisma • Auth.js

2026

- Personal development platform for goals, milestones, habits, streaks, and progress tracking.
- Implemented user-scoped Goals and Milestones CRUD with Zod validation, ownership checks, completion controls, status filters, and automatic progress recalculation.

Tracebit - Issue Tracker | Next.js, TypeScript, Prisma, Neon PostgreSQL, Tailwind CSS

2026

- Developed a Jira-inspired issue tracker with database-backed project and issue CRUD, reusable validation, and server-side workflows.
- Structured relational project-to-issue data and management screens to demonstrate full-stack CRUD and application architecture.

Clicklens - URL Shortener & Analytics | Next.js, TypeScript, Prisma, Recharts, Tailwind CSS

2026

- Developed the foundation for short-link creation and an analytics dashboard designed to track click activity and link performance.

Likhamat - Content Sharing for Crafters | Next.js, Node.js, Express, MongoDB, Tailwind CSS

2025 - 2026

- Co-developed a MERN-based community platform with posts, challenges, leaderboards, messaging, announcements, user XP/impact, and admin workflows.
- Worked across frontend and backend features including challenge management, winner displays, content feeds, and third-party payment integration.

EDUCATION

PHINMA University of Pangasinan

Bachelor of Science in Information Technology - System Development Track

2026
